FULL-STACK SOFTWARE ENGINEER · GLASGOW, UK

i build fast, full-stack products — from Stripe-billed SaaS to a browser DAW running on the Web Audio API. comfortable owning both the data layer and the interface on top of it.

SELECTED WORK

coverletter.my mar 2026 · solo · 100+ users
Full-stack SaaS webapp with Stripe billing integration. Built tiered user access with validation enforced on both front and back end, plus API rate limiting to keep usage in check.
[Next.js](#) · [Stripe](#) · [Postgres](#) · [Node](#)

2d.social beta
Bulletin-board style social platform. Focused on the data architecture behind feeds and posts to keep the app fast as usage grows.
[Next.js](#) · [React](#)

lofemaker.com may 2026
Browser-based DAW built on the Web Audio API. Used Zustand to keep playback and mix state as one objective source of truth across the UI.
[Next.js](#) · [React](#) · [Zustand](#) · [Web Audio API](#)

EXPERIENCE

Revolution Gaming — Software Developer & Data Analyst feb-jun 2025
Built internal Python/SQL tools for cleaning and visualizing event data; analyzed trends and presented findings to inform strategy.

Yaji.online — Front End Web Developer dec 2024-feb 2025
Designed a custom Shopify storefront and implemented analytics-driven A/B tests to boost engagement.

ALSO BUILT

CS2 market tracker — Python scrapers + time-series analysis on skin price trends. [Python](#) · [Pandas](#)

Custom gaming mouse — 3D-printed ergonomic shell, custom PCB, PixArt sensor firmware. [KiCad](#) · [C++](#)
